A normal distribution curve is shown with a vertical line at a point labeled z on the horizontal axis. The area under the curve to the left of z is shaded gray, representing the cumulative probability $P(Z \leq z)$.

Number of Runs Critical Values Table

This table shows critical values at $\alpha = 0.05$ for a two-tailed test.

Each cell shows two values, one smaller and one larger. Reject H_0 if:

- a. The number of runs is less than or equal to the smaller value, **OR**
- b. The number of runs is greater than or equal to the larger value.
